Petition for Abolishment of All Taxation on Income

Dear Congressman,

The United States government, by way of the federal income tax and other federal taxes, has deprived the American public of the prosperity it has rightfully earned. It has destroyed the ability of most Americans to save for their futures and their children's futures. It has forced the American people into ongoing and almost insurmountable debt. And it has otherwise crippled the American Dream for millions of honest, hard-working citizens.

Therefore, as my representative, I strongly request that you **introduce legislation which repeals all federal income taxes, including individual, corporate, "self-employment" and "employment" taxes** (i.e., Subtitles A and C of Title 26 of the United States Code), **"replacing" them with nothing**: no alternative national income tax, flat tax, consumption tax, sales tax, or any other general national tax. This can be done without creating federal budget deficits by also defunding all federal agencies and activities that are not authorized by the U.S. Constitution. If such legislation has been introduced already, which would meet these criteria, then I strongly request that you add your support to your colleagues who have done so.

My communication today is a follow-up to the Take Your Money Back DVD I recently watched. If you'd like to see this video (abbreviated version), please visit www.takeyourmoneyback.com or www.jbs.org/takeyourmoneyback. Your participation is critical to helping get Americans back on sound economic footing to once again help them achieve the American Dream.

A growing and sizeable number of Americans have reached their limit in tolerating this burdensome and economically unsound federal tax system. As your constituents, we will be monitoring your voting record closely to ensure we get the kind of representation we need to make the necessary changes.

I and many others will continue to follow up with you and other elected officials regarding this to track your progress.

We look forward to hearing from you on this vitally important matter.
